Tampa, FL 33607

April 26, 2021

To Whom It May Concern:

I am the Senior Superintendent for Barr&Barr on the Midtown Tampa Development over-seeing all construction activities for the Developers. Having successfully worked with Fire Stop Systems on this project I can highly recommend them for any of our future projects and would recommend them to others in our industry.

Fire Stop Systems has been a valuable resource for the success of the overall project here at Midtown Tampa. Every instance they have been responsive to the schedule needs and have performed in the most professional manner. They have great crews who take the time to both protect the work of others, but also do an outstanding job of containment and cleanup of their work. Their office support is exceptional with timely delivery of materials and equipment and support of their crews and the project team.

Spray applied fire proofing has the reputation of being very disruptive on projects and extremely messy. Having worked with these guys on this project, has proven that it does not have to be that way.

Again, I highly recommend Fire Stop Systems for any future Fire Proofing operations.

Sincerely,

**Robert Curren**  
*Senior Superintendent*
